Auctioneer's Comments

This property is for sale by the Modern Method of Auction which is not to be confused with traditional auction. The Modern Method of Auction is a flexible buyer friendly method of purchase. We do not require the purchaser to exchange contracts immediately, but grant 28 days to achieve exchange of contracts from the date the buyer's solicitor is in receipt of the draft contracts and a further 28 days thereafter to complete. Allowing the additional time to exchange on the property means interested parties can proceed with traditional residential finance. Upon close of a successful auction or if the vendor accepts an offer during the auction, the buyer will be required to put down a non-refundable reservation fee of 3.5% subject to a minimum of £5,000 plus VAT which secures the transaction and takes the property off the market. The buyer will be required to sign an Acknowledgment of Reservation form to confirm acceptance of terms prior to solicitors being instructed. Copies of the Reservation form to confirm acceptance of terms prior to solicitors being instructed. Copies of the Reservation form and all terms and conditions can be found in the Legal Pack which can be downloaded for free from the auction section of our website or requested from our Auction Department. Please note this property is subject to an undisclosed reserve price which is generally no more than 10% in excess of the Starting Bid. Date of assessment: 18 March 2010
Date of certificate: 18 March 2010
Reference number: 0778-2838-6376-9990-0591
Type of assessment: RdSAP, existing dwelling
Total floor area: 35 m²

This home's performance is rated in terms of energy use per square metre of floor area, energy efficiency based on fuel costs and environmental impact based on carbon dioxide (CO₂) emissions.

Energy Efficiency Rating

	Current	Potential
<i>Very energy efficient - lower running costs</i>		
(92 plus) A		
(81-91) B		
(69-80) C	78	82
(55-68) D		
(39-54) E		
(21-38) F		
(1-20) G		
<i>Not energy efficient - higher running costs</i>		
England & Wales	EU Directive 2002/91/EC	

The energy efficiency rating is a measure of the overall efficiency of a home. The higher the rating the more energy efficient the home is and the lower the fuel bills are likely to be.

Environmental Impact (CO₂) Rating

	Current	Potential
<i>Very environmentally friendly - lower CO₂ emissions</i>		
(92 plus) A		
(81-91) B		
(69-80) C	75	80
(55-68) D		
(39-54) E		
(21-38) F		
(1-20) G		
<i>Not environmentally friendly - higher CO₂ emissions</i>		
England & Wales	EU Directive 2002/91/EC	

The environmental impact rating is a measure of a home's impact on the environment in terms of carbon dioxide (CO₂) emissions. The higher the rating the less impact it has on the environment.

Estimated energy use, carbon dioxide (CO₂) emissions and fuel costs of this home

	Current	Potential
Energy use	253 kWh/m ² per year	206 kWh/m ² per year
Carbon dioxide emissions	1.5 tonnes per year	1.2 tonnes per year
Lighting	£18 per year	£18 per year
Heating	£270 per year	£226 per year
Hot water	£69 per year	£69 per year

The figures in the table above have been provided to enable prospective buyers and tenants to compare the fuel costs and carbon emissions of one home with another. To enable this comparison the figures have been calculated using standardised running conditions (heating periods, room temperatures, etc.) that are the same for all homes, consequently they are unlikely to match an occupier's actual fuel bills and carbon emissions in practice. The figures do not include the impacts of the fuels used for cooking or running appliances, such as TV, fridge etc.; nor do they reflect the costs associated with service, maintenance or safety inspections. Always check the certificate date because fuel prices can change over time and energy saving recommendations will evolve.

To see how this home can achieve its potential rating please see the recommended measures.
