"THE NATIONAL PROPERTY SERVICE"

Shepherd Chartered Surveyors

16 Carlyle Court Craigshill

Livingston EH54 5NN

Energy performance certificate

Energy Performance Certificate

Address of dwelling and other details

16 Carlyle Court Dwelling type: Semi-detached house

Craigshill Name of approved organisation: RICS
Livingston Membership number: RICS091801
EH54 5NN Date of certificate: 31 May 2012

Reference number: 0160-2230-2250-9772-2521 Type of assessment: RdSAP, existing dwelling

Total floor area: 123 m²

Main type of heating and fuel: Boiler and radiators, mains gas

This dwelling's performance ratings

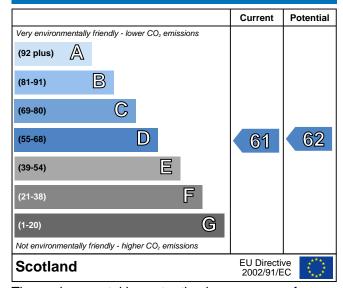

This dwelling has been assessed using the RdSAP 2009 methodology. Its performance is rated in terms of the energy use per square metre of floor area, energy efficiency based on fuel costs and environmental impact based on carbon dioxide (CO₂) emissions. CO₂ is a greenhouse gas that contributes to climate change.

Energy Efficiency Rating Current Potential Very energy efficient - lower running costs (92 plus) (81-91) В \mathbb{C} (69-80)66 65 (55-68)匡 (39-54) F (21-38)

The energy efficiency rating is a measure of the overall efficiency of a home. The higher the rating the more energy efficient the home is and the lower the fuel bills are likely to be.

G

Environmental Impact (CO₂) Rating

The environmental impact rating is a measure of a home's impact on the environment in terms of carbon dioxide (CO₂) emissions. The higher the rating the less impact it has on the environment.

Approximate current energy use per square metre of floor area: 208 kWh/m² per year

EU Directive 2002/91/EC

Approximate current CO₂ emissions: 40 kg/m² per year

Cost effective improvements

Not energy efficient - higher running costs

Below is a list of lower cost measures that will raise the energy performance of the dwelling to the potential indicated in the tables above. Higher cost measures could also be considered and these are recommended in the attached energy report.

1 Low energy lighting for all fixed outlets

A full energy report is appended to this certificate

(1-20)

Scotland

Remember to look for the energy saving recommended logo when buying energy-efficient products. It's a quick and easy way to identify the most energy-efficient products on the market.

Information from this EPC may be given to the Energy Saving Trust to provide advice to householders on financial help available to improve home energy efficiency.

Energy Report

The Energy Performance Certificate and Energy Report for this dwelling were produced following an energy assessment undertaken by a member of RICS. This is an organisation which has been approved by the Scottish Ministers. The certificate has been produced under the Building (Scotland) Amendment Regulations 2006 and a copy of the certificate and this energy report have been lodged on a national register.

Assessor's name: Craig J Brown Company name/trading name: J & E Shepherd

Address: 4 Grampian Court, Beveridge

Square, Livingston, EH54 6QF

Phone number: 01506416777 Fax number: 01506416888

E-mail address: livingston@shepherd.co.uk

Related party disclosure: No related party

Estimated energy use, carbon dioxide (CO₂) emissions and fuel costs of this home

	Current	Potential
Energy use	208 kWh/m² per year	201 kWh/m² per year
Carbon dioxide emissions	4.9 tonnes per year	4.8 tonnes per year
Lighting	£106 per year	£59 per year
Heating	£781 per year	£789 per year
Hot water	£100 per year	£100 per year

The figures in the table above have been provided to enable prospective buyers and tenants to compare the fuel costs and carbon emissions of one home with another. To enable this comparison the figures have been calculated using standardised running conditions (heating periods, room temperatures, etc.) that are the same for all homes, consequently they are unlikely to match an occupier's actual fuel bills and carbon emissions in practice. The figures do not include the impacts of the fuels used for cooking or running appliances, such as TV, fridge etc.; nor do they reflect the costs associated with service, maintenance or safety inspections. Always check the certificate date because fuel prices can change over time and energy saving recommendations will evolve.

About the building's performance ratings

The ratings on the certificate provide a measure of the building's overall energy efficiency and its environmental impact, calculated in accordance with a national methodology that takes into account factors such as insulation, heating and hot water systems, ventilation and fuels used.

Not all buildings are used in the same way, so energy ratings use 'standard occupancy' assumptions which may be different from the specific way you use your home.

Buildings that are more energy efficient use less energy, save money and help protect the environment. A building with a rating of 100 would cost almost nothing to heat and light and would cause almost no carbon emissions. The potential ratings in the certificate describe how close this building could get to 100 if all the cost effective recommended improvements were implemented.

About the impact of buildings on the environment

One of the biggest contributors to global warming is carbon dioxide. The way we use energy in buildings causes emissions of carbon. The energy we use for heating, lighting and power in homes produces over a quarter of the UK's carbon dioxide emissions and other buildings produce a further one-sixth.

The average household causes about 6 tonnes of carbon dioxide every year. Adopting the recommendations in this report can reduce emissions and protect the environment. You could reduce emissions even more by switching to renewable energy sources. In addition there are many simple everyday measures that will save money, improve comfort and reduce the impact on the environment. Some examples are given at the end of this report.

Summary of this home's energy performance related features

The table below gives an assessment of the key individual elements that have an impact on this home's energy and environmental performance. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the physical condition of any element. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology based on age and type of construction.

Element	Description	Current performance	
Element	Description	Energy Efficiency	Environmental
Walls	Cavity wall, as built, no insulation (assumed) Timber frame, as built, insulated (assumed) Timber frame, as built, partial insulation (assumed)	* * \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \	* * \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \
Roof	Pitched, 250 mm loft insulation Flat, insulated	* * * * * * * * * * * * * * * * * * *	* * * * * * * * * * * * * * * * * * *
Floor	Suspended, no insulation (assumed) Solid, no insulation (assumed)	- -	- -
Windows	Fully double glazed	* * * ☆ ☆	***
Main heating	Boiler and radiators, mains gas	****	****
Main heating controls	Programmer, room thermostat and TRVs	****	****
Secondary heating	Room heaters, mains gas	-	-
Hot water	From main system	****	****
Lighting	Low energy lighting in 20% of fixed outlets	***	***

Current energy efficiency rating

D 65

Current environmental impact (CO₂) rating

D 61

Low and zero carbon energy sources

These are sources of energy (producing or providing electricity or hot water) which emit little or no carbon dioxide into the atmosphere. There are none applicable to this home.

Recommended measures to improve this home's energy performance

The measures below are cost effective. The performance ratings after improvement listed below are cumulative, that is they assume the improvements have been installed in the order that they appear in the table. However you should check the conditions in any covenants, warranties or sale contracts, and whether any legal permissions are required such as a building warrant, planning consent or listed building restrictions. The indicative costs are representative for most properties but may not apply in a particular case.

	Indicative cost	Typical savings per year	Ratings after improvement	
Lower cost measures			Energy efficiency	Environmental impact
1 Low energy lighting for all fixed outlets	£40	£40	D 66	D 62
Sub-total		£40		
Higher cost measures				
2 Replace boiler with new condensing boiler	£1,500 - £3,500	£58	D 68	D 65
Total		£98		
Potential energy efficiency rating			D 68	
Potential environmental impact (CO ₂)			D 65	

Further measures to achieve even higher standards

The further measures listed below should be considered in addition to those already specified if aiming for the highest possible standards for this home. Some of these measures may be cost-effective when other building work is being carried out such as an alteration, extension or repair. Also they may become cost-effective in the future depending on changes in technology costs and fuel prices. However you should check the conditions in any covenants, warranties or sale contracts, and whether any legal permissions are required such as a building warrant, planning consent or listed building restrictions. The indicative costs are representative for most properties but may not apply in a particular case.

3 Solar photovoltaic panels, 2.5 kWp	£11,000 - £20,000	£219	C 76	C 72
Enhanced energy efficiency rating			C 76	
Enhanced environmental impact (CO ₂) rating				C 72

Improvements to the energy efficiency and environmental impact ratings will usually be in step with each other. However, they can sometimes diverge because reduced energy costs are not always accompanied by a reduction in carbon dioxide (CO₂) emissions.

About the cost effective measures to improve this home's performance ratings

If you are a tenant, before undertaking any work you should check the terms of your lease and obtain approval from your landlord if the lease either requires it, or makes no express provision for such work.

Lower cost measures

These measures are relatively inexpensive to install and are worth tackling first. The indicative costs of measures included earlier in this EPC include the costs of professional installation in most cases. Some of them may be installed as DIY projects. DIY is not always straightforward, and sometimes there are health and safety risks, so take advice before carrying out DIY improvements.

1 Low energy lighting

Replacement of traditional light bulbs with energy saving recommended ones will reduce lighting costs over the lifetime of the bulb, and they last up to 12 times longer than ordinary light bulbs. Also consider selecting low energy light fittings when redecorating; contact the Lighting Association for your nearest stockist of Domestic Energy Efficient Lighting Scheme fittings.

Higher cost measures

2 New condensing boiler

A condensing boiler is capable of much higher efficiencies than other types of boiler, meaning it will burn less fuel to heat this property. This improvement is most appropriate when the existing central heating boiler needs repair or replacement, but there may be exceptional circumstances making this impractical. Condensing boilers need a drain for the condensate which limits their location; remember this when considering remodelling the room containing the existing boiler even if the latter is to be retained for the time being (for example a kitchen makeover). Building regulations may apply to this work, so it is best to obtain advice from your local authority building standards department and from a qualified heating engineer.

About the further measures to achieve even higher standards

Further measures that could deliver even higher standards for this home. You should check the conditions in any covenants, planning conditions, warranties or sale contracts before undertaking any of these measures. If you are a tenant, before undertaking any work you should check the terms of your lease and obtain approval from your landlord if the lease either requires it, or makes no express provision for such work.

3 Solar photovoltaic (PV) panels

A solar PV system is one which converts light directly into electricity via panels placed on the roof with no waste and no emissions. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Planning restrictions may apply in certain neighbourhoods and you should check this with the local authority. Building regulations may apply to this work, so it is best to obtain advice from your local authority building standards department and from a suitably qualified electrician. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for solar photovoltaic panels, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

What can I do today?

Actions that will save money and reduce the impact of your home on the environment include:

- Ensure that you understand the dwelling and how its energy systems are intended to work so as to obtain the maximum benefit in terms of reducing energy use and CO₂ emissions.
- If you have a conservatory or sunroom, avoid heating it in order to use it in cold weather and close doors between the conservatory and dwelling.
- Check that your heating system thermostat is not set too high (in a home, 21°C in the living room is suggested) and use the timer to ensure you only heat the building when necessary.
- Turn off lights when not needed and do not leave appliances on standby. Remember not to leave chargers
 (e.g. for mobile phones) turned on when you are not using them.
- Close your curtains at night to reduce heat escaping through the windows.
- If you're not filling up the washing machine, tumble dryer or dishwasher, use the half-load or economy programme. Minimise the use of tumble dryers and dry clothes outdoors where possible.
- Check the draught-proofing of windows and replace it if appropriate.
- If you have unused open chimneys consider blocking them off (making provision for a ventilation opening and a cowl on top of the chimney to avoid dampness).

For advice on how to take action and to find out about offers available to help make your home more energy efficient, call 0800 512 012 or visit www.energysavingtrust.org.uk.

Scottish Single Survey

survey report on:

Property address	16 Carlyle Court Craigshill Livingston EH54 5NN
Customer	Mr & Mrs Little
Customer address	
Prepared by	J & E Shepherd
Date of inspection	16th July 2014

PART 1 - GENERAL

1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property¹.

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

To date, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in the expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

¹ Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions. The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:-

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report ² will be from information contained in the Report and the generic Mortgage Valuation Report.

² Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct

1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

1.10 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format;

- the "Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion;
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

PART 2 - DESCRIPTION OF THE REPORT

2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- Category 3: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2. Category 2: Repairs or replacement requiring future attention, but estimates are still advised.
- 3. Category 1: No immediate action or repair is needed.

WARNING:

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value, the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

1. Information and scope of inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc. will not be inspected or reported on.

Description	Former Local Authority semi detached villa linked by a pend.
Accommodation	GROUND FLOOR: Entrance Hallway, Living Room, Kitchen, Cloakroom (with Wc) & Utility Area. FIRST FLOOR: Bedroom 1, Bedroom 2, Bedroom 3 & Bathroom (with Wc).
Gross internal floor area (m²)	123m² or thereby.
Neighbourhood and location	The subjects are situated in an established area of similar style properties in the Craigshill suburb of Livingston convenient for good shopping, educational and social amenities.
Age	Originally built around 1968.
Weather	Wet, raining.
Chimney stacks	A metal flue projects from the rear wall for the living room fire.
Roofing including roof space 16 Carlyle Court, Craigshill	Sloping roofs were visually inspected with the aid of binoculars where appropriate. Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3m ladder externally. Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property. If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so.

	The roof is mono pitched overlaid in profile metal sheeting with profile metal sheeting to the flat roof of the utility area offshoot. Access was gained to the roof void via a hatch formed at the first floor hallway ceiling. The roof is of timber frame construction with
	spray insulation between the trusses and the roof covering.
Rainwater fittings	Visually inspected with the aid of binoculars where appropriate.
	PVC gutters and downpipes.
Main walls	Visually inspected with the aid of binoculars where appropriate.
	Foundations and concealed parts were not exposed or inspected.
	The main walls are constructed of cavity brick/blockwork harled externally with timber panelling at first floor level. The utility area is of timber frame construction enclosed in brick/blockwork roughcast externally.
Windows, external doors and joinery	Internal and external doors were opened and closed where keys were available.
	Random windows were opened and closed where possible.
	Doors and windows were not forced open.
	The windows are of UPVC hopper and hinged design fitted with sealed unit double glazing. UPVC double glazed French doors are fitted at the living room.
	The main door is of UPVC design with a double glazed insert. A UPVC double glazed door is fitted in the kitchen.
	Fascia boarding is finished in PVC.
External decorations	Visually inspected.
	The walls are finished in masonry paint with the timber panelling stained.
Conservatories / porches	Not applicable.
Communal areas	Not applicable.

Garages and permanent outbuildings	Visually inspected.
	There is no garage.
	A timber/felt shed is located in the rear garden.
T	I
Outside areas and boundaries	Visually inspected.
	The front garden is laid out with a mono block driveway.
	The rear garden is laid out with slabbing and borders being bound by timber fencing.
Ceilings	Visually inspected from floor level.
	The ceiling areas are lined with plasterboard sheeting. PVC
	panelling is fitted in the toilet and bathroom with polystyrene tiles in the upper hallway.
Internal walls	Visually inspected from floor level.
	Using a moisture meter, walls were randomly tested for dampness where considered appropriate.
	The internal walls are lined with plasterboard sheeting. The bathroom and toilet are fully tiled with the kitchen partly tiled.
Flaces in classic at each flaces	Conference of compared flagger compared control of the control of
Floors including sub floors	Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.
	Flooring is mostly of suspended timber construction. The utility area has a solid concrete floor. There was no access to the sub floor space.
Internal joinery and kitchen fittings	Built-in cupboards were looked into but no stored items were moved.
	Kitchen units were visually inspected excluding appliances.
	Skirtings and facings are of softwood. Doors are of timber panel design. Access to the upper accommodation is via a return timber staircase. Kitchen units are provided at wall and base levels. Cupboards are incorporated to the hall and landing.
Chimney breasts and fireplaces	Visually inspected.
	No testing of the flues or fittings was carried out.
	The living room flame effect gas fire has a marble hearth with reconstituted stone surround.

Internal decorations	Visually inspected.
	The walls and ceiling areas have been papered and painted.
Cellars	Not applicable.
Electricity	Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on. Electricity is from the mains grid with the installation comprising
	13amp socket outlets. The meter is located in the hallway cupboard.
Gas	Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.
	Gas is from the mains supply with the meter being located below the sink.
Water, plumbing, bathroom fittings	Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.
	No tests whatsoever were carried out to the system or appliances.
	Water is from the mains supply and, where seen, the installation is of copper and plastic supply pipes with PVC wastepipes. The kitchen is fitted with an enamel sink and there is plumbing for a washing machine in the utility area. Sanitary arrangements comprise a two piece white suite in the ground floor toilet and a three piece white suite with shower in the main bathroom.
Heating and hot water	Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.
	No tests whatsoever were carried out to the system or appliances.
	Hot water is provided by the gas fired boiler situated in the ground floor hallway cupboard and ventilated by means of a fanned flue. The boiler services corrugated radiators fitted with thermostats through copper piping.

Drainage	Drainage covers etc. were not lifted.
	Neither drains nor drainage systems were tested.
	All foul and surface water drainage is assumed to be to the main public sewer. The system was not tested.
Fire, smoke and burglar alarms	Visually inspected.
	No tests whatsoever were carried out to the system or appliances.
	Smoke detectors are fitted to the ground and first floor hallway ceilings.
Any additional limits to inspection	Inspection of the flooring was restricted due to the nature of fitted floorcoverings. No sub- floor inspection was carried out.
	Not all windows were tested.
	The roof space was not floored and not entered into for health and safety reasons our inspection was from a hatch located on the landing.
	Stored items to cupboards limited our inspection of these areas.
	All houses built prior to 1999 may contain elements of asbestos but an asbestos survey has not been carried out.
	An inspection for Japanese Knotweed was not carried out. This is a plant which is subject to control regulation, is considered to be invasive and one which can render a property unsuitable for some mortgage lenders. It is therefore assumed that there is no Japanese Knotweed within the boundaries of the property or its neighbouring property. Identification of Japanese Knotweed is best undertaken by a specialist contractor.

2. Condition

This section identifies problems and tells you about the urgency of any repairs by using one of the following three categories:

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	

Structural movement	
Repair category	1
Notes	

Dampness, rot and infestation	
Repair category	1
Notes	Random damp meter readings were taken and no excessive recordings were noted.

Chimney stacks	
Repair category	1
Notes	

Roofing including roof space	
Repair category	1
Notes	Redundant asbestos/cement cold water tank in situ in the roof void.

Rainwater fittings	
Repair category	1
Notes	

Main walls		
Repair category	1	
Notes		
Windows, external of	doors and joinery	
Repair category	2	
Notes	Failed double glazed sealed units.	
External decoration	ns	
Repair category	1	
Notes	Weathered external joinery.	
Conservatories/por	ches	
Repair category	-	
Notes	Not applicable.	
Communal areas		
Repair category	-	
Notes	Not applicable.	
Garages and permanent outbuildings		
Repair category	1	
Notes		
Outside areas and boundaries		
Repair category	1	
I		

Notes

Ceilings	
Repair category	2
Notes	Typical blemishes. Polystyrene ceiling tiles are fitted to the stairwell and first floor hallway ceiling. These are a fire risk and should be removed.

Internal walls	
Repair category	1
Notes	Condensation to the walls in the utility area.

Floors including sub-floors	
Repair category	1
Notes	Loose and uneven sections of flooring.

Internal joinery and kitchen fittings	
Repair category	2
Notes	No handrail/enclosure to the bottom section of the staircase.

Chimney breasts and fireplaces	
Repair category	1
Notes	

Internal decorations	
Repair category 1	
Notes Normal wear and tear.	

Cellars	
Repair category	-
Notes	Not applicable.

Electricity	
Repair category	1
Notes	Not tested. The Institution of Engineering and Technology recommends that inspection and testings are undertaken at least every 10 years and on a change of occupancy. It should be appreciated that only the most recently constructed or rewired properties will have installations which fully comply with present IET Regulations.

Gas	
Repair category	1
Notes	Not tested. In the interests of safety and in light of recent regulations it would be prudent to have all gas appliances checked by a Gas Safe inspector/tradesman.

Water, plumbing and bathroom fittings	
Repair category	1
Notes	Not tested.

Heating and hot water	
Repair category	1
Notes	It is assumed that the central heating system has been properly installed, updated and maintained to meet with all current regulations and standards with particular regard to fluing and ventilation requirements.

Drainage	
Repair category	1
Notes	Not inspected.

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the previous comments for detailed information.

Structural movement	1
Dampness, rot and infestation	1
Chimney stacks	1
Roofing including roof space	1
Rainwater fittings	1
Main walls	1

Ceilings	2
Internal walls	1
Floors including sub-floors	1
Internal joinery and kitchen fittings	2
Chimney breasts and fireplaces	1
Internal decorations	1
Cellars	-
Electricity	1
Gas	1
Water, plumbing and bathroom fittings	1
Heating and hot water	1
Drainage	1

Category 3

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

Category 2

Repairs or replacement requiring future attention, but estimates are still advised.

Category 1

No immediate action or repair is needed.

Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

3. Accessibility information

Guidance notes on accessibility information

Three steps or fewer to a main entrance door of the property:

In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

Unrestricted parking within 25 metres:

For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

1. Which floor(s) is the living accommodation on?	Ground and first.
2. Are there three steps or fewer to a main entrance door of the property?	Yes X No
3. Is there a lift to the main entrance door of the property?	Yes No X
4. Are all door openings greater than 750mm?	Yes No X
5. Is there a toilet on the same level as the living room and kitchen?	Yes X No
6. Is there a toilet on the same level as a bedroom?	Yes X No
7. Are all rooms on the same level with no internal steps or stairs?	Yes No X
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes X No

4. Valuation and conveyancer issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated reinstatement cost for insurance purposes.

Matters for a solicitor or licensed conveyancer

Since the property was built the windows have been replaced and the garage altered to form a utility area. We have assumed that all necessary statutory consents have been obtained for this alteration.

Where defects or repairs have been identified within this report it is recommended that, prior to entering into any legally binding sale or purchase contract, further specialists or contractors advice and estimates should be obtained, to establish the implications, if any, on a potential offer to purchase or the sale price likely to be achieved for the property.

It is assumed that there are no statutory, town planning, road proposals or environmental matters which are likely to have an adverse effect on the property.

Your conveyancer should confirm that the Title is clean and heritable with no onerous burdens or conditions.

There are mutual parts and boundaries your conveyancer should confirm your repairing and maintaining responsibility for these parts.

This is a replacement of the original survey undertaken on 30/05/2012.

Estimated reinstatement cost for insurance purposes

For Reinstatement Cost Assessment purposes it is recommended that the subjects be insured for a sum of not less than £185,000 (ONE HUNDRED AND EIGHTY FIVE THOUSAND POUNDS STERLING).

Valuation and market comments

Having considered matters, taking account of our general observations on site, we are of the opinion that the current market value of the subjects in their present condition and with the benefit of full vacant possession may be fairly stated in the capital sum of £120,000 (ONE HUNDRED AND TWENTY THOUSAND POUNDS STERLING).

Property Questionaire

HERD property questionnaire

Property address	
	16 Carlyle Court
	Almond South
	Livingston
	EH545NN
Seller(s)	
Completion date of property questionnaire	30/05/2012

Note for sellers

- Please complete this form carefully. It is important that your answers are correct.
- The information in your answers will help ensure that the sale of your house goes smoothly. Please answer each question with as much detailed information as you can.
- If anything changes after you fill in this questionnaire but before the date of entry for the sale of your house, tell your solicitor or estate agent immediately.

Information to be given to prospective buyer(s)

1.	Length of ownership	
	How long have you owned the property? 18 yrs	
2.	Council tax	
	Which Council Tax band is your property in? (Please tick one) ☐ A ☐ B ☐ C ☑ D ☐ E ☐ F ☐ G ☐ H	
3.	Parking	
	What are the arrangements for parking at your property? (Please tick all that apply)	
	• Garage	
	Allocated parking space	
	• Driveway	
	Shared parking	
	On street	
	Resident permit	
	Metered parking	
	Other (please specify):	
4.	Conservation area	
	Is your property in a designated Conservation Area (that is an area of special architectural or historical interest, the character or appearance of which it is desirable to preserve or enhance)?	☐ Yes ☑ No ☐ Don't know

5.	Listed buildings	
	Is your property a Listed Building, or contained within one (that is a building recognised and approved as being of special architectural or historical interest)?	☐ Yes ☑ No
6.	Alterations/additions/extensions	
a.	(i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)?	⊠ Yes □ No
	If you have answered yes, please describe below the changes which you have made:	
	removed an interal wall	
	(ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work?	
	If you have answered yes, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking.	
	If you do not have the documents yourself, please note below who has these documents and your solicitor or estate agent will arrange to obtain them:	
b.	Have you had replacement windows, doors, patio doors or double glazing installed in your property?	⊠ Yes □ No
	If you have answered yes, please answer the three questions below:	
	(i) Were the replacements the same shape and type as the ones you replaced?	⊠ Yes □ No
	(ii) Did this work involve any changes to the window or door openings?	☐ Yes ☑ No
	(iii) Please describe the changes made to the windows doors, or patio approximate dates when the work was completed):	doors (with
Please give any guarantees which you received for this work to your solicitor agent.		

7.	Central heating		
a.	Is there a central heating system in your property? (Note: a partial central heating system is one which does not heat all the main rooms of the property — the main living room, the bedroom(s), the hall and the bathroom). If you have answered yes or partial — what kind of central heating is there? (Examples: gas-fired, solid fuel, electric storage heating, gas warm air).	☐ Yes ☐ No ☐ Partial	
	If you have answered yes, please answer the three questions below:		
	(i) When was your central heating system or partial central heating 2005	g system installed?	
	(ii) Do you have a maintenance contract for the central heating system? If you have answered yes, please give details of the company with which you have a maintenance contract: british gas	⊠ Yes □ No	
	(iii) When was your maintenance agreement last renewed? (Please and year). sep 2011	provide the month	
8.	Energy Performance Certificate		
	Does your property have an Energy Performance Certificate which is less than 10 years old?		
9.	Issues that may have affected your property		
a.	Has there been any storm, flood, fire or other structural damage to your property while you have owned it? If you have answered yes, is the damage the subject of any outstanding insurance claim?	☐ Yes ☑ No ☐ Yes ☐ No	
b.	Are you aware of the existence of asbestos in your property? If you have answered yes, please give details:	☐ Yes ☑ No	

10.	Services					
a. Pl	Please tick which services are connected to your property and give details of the supplier:					
	Services	Connected	Supplier			
	Gas or liquid petroleum gas	yes	british gas			
	Water mains or private water supply	yes	scottish wat	er		
	Electricity	yes	british gas			
	Mains drainage	yes	scottish wat	er		
	Telephone	yes	bt			
	Cable TV or satellite	yes	sky			
	Broadband	yes	o2			
b.	Is there a septic tank system a If you have answered yes, plea		ions below:	☐ Yes ☑ No		
	(i) Do you have appropriate consents for the discharge from your septic tank?		☐ Yes ☐ No ☐ Don't Know			
	(ii) Do you have a maintenance of the life	ase give details of the cor		☐ Yes ☐ No		

11.	Responsibilities for shared or common areas	
a.	Are you aware of any responsibility to contribute to the cost of anything used jointly, such as the repair of a shared drive, private road, boundary, or garden area? If you have answered yes, please give details:	☐ Yes ☑ No ☐ Don't Know
b.	Is there a responsibility to contribute to repair and maintenance of the roof, common stairwell or other common areas? If you have answered yes, please give details:	☐ Yes ☑ No ☐ Not applicable
c.	Has there been any major repair or replacement of any part of the roof during the time you have owned the property?	⊠ Yes □ No
d.	Do you have the right to walk over any of your neighbours' property — for example to put out your rubbish bin or to maintain your boundaries? If you have answered yes, please give details:	☐ Yes ☑ No
e.	As far as you are aware, do any of your neighbours have the right to walk over your property, for example to put out their rubbish bin or to maintain their boundaries? If you have answered yes, please give details:	☐ Yes ☑ No
f.	As far as you are aware, is there a public right of way across any part of your property? (public right of way is a way over which the public has a right to pass, whether or not the land is privately-owned.) If you have answered yes, please give details:	☐ Yes ☑ No
12.	Charges associated with your property	
a.	Is there a factor or property manager for your property? If you have answered yes, please provide the name and address, and give details of any deposit held and approximate charges:	☐ Yes ☑ No

b.	Is there a common buildings insurance policy? If you have answered yes, is the cost of the insurance included in your monthly/annual factor's charges? Please give details of any other charges you have to pay on a regular bupkeep of common areas or repair works, for example to a residents' a maintenance or stair fund.	
13.	Specialist works	
a.	As far as you are aware, has treatment of dry rot, wet rot, damp or any other specialist work ever been carried out to your property? If you have answered yes, please say what the repairs were for, whether you carried out the repairs (and when) or if they were done before you bought the property.	☐ Yes ☑ No
b.	As far as you are aware, has any preventative work for dry rot, wet rot, or damp ever been carried out to your property? If you have answered yes, please give details:	☐ Yes ☑ No
C.	If you have answered yes to 13(a) or (b), do you have any guarantees relating to this work? If you have answered yes, these guarantees will be needed by the purchaser and should be given to your solicitor as soon as possible for checking. If you do not have them yourself please write below who has these documents and your solicitor or estate agent will arrange for them to be obtained. You will also need to provide a description of the work carried out. This may be shown in the original estimate. Guarantees are held by:	☐ Yes ☐ No

14.	Guarantees					
a.	Are there any guarantees or warranties for any of the following:					
		No	Yes	Don't know	With title deeds	Lost
(i)	Electrical work	\boxtimes				
(ii)	Roofing	\boxtimes				
(iii)	Central heating	\boxtimes				
(iv)	National House Building Council (NHBC)	\boxtimes				
(v)	Damp course	\boxtimes				
(vi)	Any other work or installations? (for example, cavity wall insulation, underpinning, indemnity policy)	\boxtimes				
b.	If you have answered 'yes' or 'with title deeds', please give details of the work or installations to which the guarantee(s) relate(s):					
C.	Are there any outstanding claims under any of the guarantees listed above? If you have answered yes, please give details:			☐ Yes ☑ No		
15.	Boundaries					
	So far as you are aware, has any boundary of your property been moved in the last 10 years? If you have answered yes, please give details:			☐ Yes ☑ No ☐ Don't kn	now	

16.	Notices that affect your property	
	In the past three years have you ever received a notice:	
a.	advising that the owner of a neighbouring property has made a planning application?	☐ Yes ☑ No
b.	that affects your property in some other way?	☐ Yes ☑ No
c.	that requires you to do any maintenance, repairs or improvements to your property?	☐ Yes ☑ No
	If you have answered yes to any of a-c above, please give the notices estate agent, including any notices which arrive at any time before the the purchaser of your property.
